### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The claim is allowable because the prior art fails to teach an angle formed between lines through a central axis of the first eccentric shaft, a central axis of the driving gear and a central axis of the second eccentric shaft is obtuse, wherein the lines lie in a plane which is perpendicular to the first eccentric shaft as set forth in claim 1. Also, the prior art fails to teach a bearing having an exterior radial connecting pin and a second portion of a rocker engaging with the exterior radial connecting pin as set forth in claim 5.

Michaelson teaches a housing 51, a plunger 54, a driving gear 43, a second eccentric shaft 47, a sleeve bearing 58 and a link shaft 61. Also, Fuchs et al. teaches the use of a first eccentric shaft 10, a pushing member 21, a lifting member 24, a sleeve bearing 26, a spring (see Fig. 1) and an angle of  $180^\circ$  (see Fig. 2), rather than an obtuse angle. The combination of Michaelson and Fuchs et al. fails to teach the angle formed between lines through a central axis of the first eccentric shaft, a central axis of the driving gear and a central axis of the second eccentric shaft is obtuse, wherein the lines lie in a plane which is perpendicular to the first eccentric shaft as set forth in claim 1.

Fuchs et al. teaches a bearing 26. However, Fuchs et al. fails to teach the exterior radial connecting pin and the second portion of the rocker engaging with the exterior radial connecting pin as set forth in claim 5.
